

ROCK BITS

12-1/4" BM1HVSXC

IADC Code: 117

GLINIK
DRILLING TOOLS

FEATURES

Bearing Type.....journal, sealed

Cutting Structure.....very soft milled teeth

Leg Protection.....shirttail hardfacing and tungsten carbide inserts

Connection.....pin 6-5/8 Reg

DRILLING APPLICATIONS

Designed for drilling in very soft formations, unstratified, poorly compacted rocks such as shale clays, clays, poorly compacted clays and sandstones, marl limestones, salts, gypsum, hard coals, iron ores.

BENEFITS

Optimal ROP obtained by precisely combining the cutting structure and effective flushing system.

Exceptional bit reliability thanks to optimized bearing system.

Guarantee of drilling long intervals and maintaining hole geometry due to use of advanced gauge protection technology.
