ROCK BITS

8-1/2" S3GYSX

IADC Code: 637

FEATURES

Bearing Type.....journal, sealed

Cutting Structure.....medium tungsten carbide inserts

Leg Protection.....shirttail hardfacing and tungsten carbide inserts

Connection.....pin 4-1/2 Reg

DRILLING APPLICATIONS

Designed for drilling in medium hard and abrasive rocks such as: sandstones with streaks of quartz, hard limestone or chert, conglomerates with limestone, ferruginous or silica binder, crystalline dolomites, hematite ores, siderites, limonites, hard shales.

BENEFITS

Exceptional drilling performance achieved by optimally selected cutting structure geometry in combination with effective flushing system.

Exceptional bit reliability thanks to top quality materials and optimized design of bearing system.

Guarantee of drilling long intervals while maintaining proper well geometry due to premium materials.
